

InAmigos Foundation

Website Improvement Analysis & Recommendations

Site reviewed: <https://inamigosfoundation.org.in/>

Prepared: August 2026

A note on method

This review is based on a full read-through of the live site's pages, page structure, navigation, links, and text/content — Home, About Us, Causes, Contact, Volunteers, Blog, Events, and Gallery. Each finding below is written the way an annotation would read: which page/section it's on, what's wrong, how severe it is, and what to do about it.

Executive Summary

InAmigos Foundation's site does a good job presenting the organisation's credibility (Section 8, 80G/12A, CSR-1, NITI Aayog, ISO 9001:2015) and its five to six named projects (Seva, Bachpanshala, Jeev, Udaan, Prakriti, Vikas). The core problem is not the concept — it's execution: one urgent security issue, several completely empty or broken pages, and a volunteer directory that leaks dozens of personal Gmail addresses to the public internet. Fixing the items below would meaningfully improve trust, usability, and how donors and CSR partners perceive the foundation.

Top priority, in order

- Remove the spam/gambling links injected at the top of every single page — this is a strong signal of a hacked site or compromised plugin (Critical).
- Populate the Causes page — it currently loads with no content at all, on a site whose entire purpose is to drive donations to causes (Critical).
- Stop publishing volunteers' personal Gmail addresses on public profile pages; add a proper donation flow instead of an external Razorpay link with no context (High).
- Fix the 'Follow us' links — Twitter, Google and Pinterest icons point to the generic homepages of those services, not the foundation's actual accounts (High).
- Add real form validation and confirmation on Contact/Volunteer forms, and captions/alt text across the Gallery (Medium).

Critical & Site-Wide Issues

These appear identically on every page (Home, About Us, Causes, Volunteers, Contact, Blog, Events), which means they live in the shared header template and should be fixed once, centrally.

Area	Issue Observed	Severity	Recommendation
Global header (all pages)	A list of 11 unrelated outbound links reading "slot gacor", "situs slot gacor", "slot thailand" etc. (online gambling / betting SEO	Critical	Treat as a security incident, not a content issue: scan the CMS/server for malware or a compromised plugin, change all admin

Area	Issue Observed	Severity	Recommendation
	spam) is injected above the real navigation on every single page.		passwords, update the CMS core and plugins, and have the developer (Visho Infotech) confirm the site is clean before anything else on this list is addressed. Search engines can also flag/penalise the whole domain while these links remain.
Global header — social icons	Twitter, Google and Pinterest icons in the header and footer link to https://twitter.com, https://google.com and https://pinterest.com — the generic homepages, not the foundation's own profiles.	High	Either link each icon to the foundation's real account, or remove the icon entirely if that platform isn't used. A generic link looks unfinished and slightly untrustworthy to a donor doing due diligence.
Global footer	Footer 'pages' block only lists About Us and Contact, even though Causes, Events, Volunteers, Blog and Gallery all exist as top-level nav items.	Low	Make the footer link set consistent with the header nav for easier scanning and better internal linking/SEO.

Image 2: Footer

Page-by-Page Findings

1. Home Page

The homepage leads with a rotating hero carrying five different taglines (BachpanSala, Udaan, Jeev, Sewa, Prakriti), followed by an about blurb, a causes teaser, volunteer stats, upcoming events, and a gallery strip.

Area	Issue Observed	Severity	Recommendation
Hero carousel	Five slides cycle through five different project names/taglines with no single clear headline — a first-time visitor has no idea what the organisation does within the first few seconds.	High	Lead with one strong, consistent statement of mission (e.g. "Serving 50,000+ lives across India") and let the carousel support it, rather than rotating the whole message each slide.
CTA buttons	"Donate Us", "Become A Volunteer" and "Join Us" are three separate, similarly-styled buttons stacked together with overlapping purposes (Become A Volunteer and Join Us both lead to volunteering).	Medium	Reduce to two clear CTAs — Donate and Volunteer — and merge the two volunteering links into one destination.
Donate button	"Donate Us" links straight to a bare Razorpay payment link (rzp.io) with no on-site donation page explaining tax benefits (80G), suggested amounts, or where funds go.	High	Build an on-site /donate page that states the 80G tax-exemption clearly, offers suggested amounts per cause, and only then hands off to the payment gateway. This directly increases donor confidence and conversion.
Impact stats block	Stats are shown as bare numbers with tiny labels ("200 / Our Volunteer", "50000 / Beneficiaries") and no visual distinction from surrounding text — easy to scroll past.	Medium	Style as a distinct stat/counter section with icons and animated count-up, and fix the grammar ("Our Volunteer" → "Volunteers").
About blurb	The homepage 'Get to Know Us Better' section is a single dense wall of text (200+ words, no subheadings) covering history, certifications and all six projects at once.	Medium	Break into short scannable chunks with subheadings or icons per project, and move the full detail to the About page (which already duplicates most of this text).
Our Causes section	Homepage 'Our Causes' section shows only a "View All Causes" link with no actual cause cards, images, or descriptions.	High	Display 3–6 cause cards (image, title, short blurb, progress or donate button) so visitors can act without leaving the homepage.

Area	Issue Observed	Severity	Recommendation
Gallery strip	Bottom gallery renders as four bare image links with no captions, hover state, or lightbox context.	Low	Add short captions and open images in a lightbox rather than as raw file links.

Get to Know Us Better

InAmigos Foundation was founded on September 23, 2020, by Mr. Govind Shukla (Founder & CEO). It is a Section 8 registered non-profit organization, licensed by the Central Government. It has its base at Chhattisgarh. It holds 80G & 12A certifications, ensuring transparency, accountability and tax-exempt benefits for donors. Our foundation is also CSR-1 registered, allowing us to collaborate with corporate partners for impactful Corporate Social Responsibility (CSR) initiatives. Additionally, we are NITI Aayog registered, aligning our work with national development goals and hold the prestigious IAF ISO 9001:2015 certification, signifying our commitment to maintaining high-quality standards in operations and service delivery. Our Key Initiatives 1. Project Seva – Providing food and clothing to the underprivileged. 2. Project Bachpanshala – Ensuring quality education for underprivileged children. 3. Project Jeev – Animal welfare, including rescue, protection and feeding. 4. Project Udaan – Women empowerment through skill development and financial independence. 5. Project Prakriti – Environmental conservation and sustainability efforts. 6. Project Vikas – Enhancing employability through skill development programs. With a strong network of dedicated professionals, volunteers and corporate partners, we work tirelessly to bring positive change in society. Our social media platforms actively

OUR CAUSES

[View All Causes](#)

Image 8: Our Causes

OUR GALLERY

Image 9: Gallery Strip

2. Causes Page

Image 10: Causes Page

Visiting /causes today returns the page shell (header, footer) with a page title and breadcrumb, but zero cause content in between — no cards, no filters, no descriptions.

Area	Issue Observed	Severity	Recommendation
Main content area	The Causes page — arguably the most important page on a fundraising site — is completely empty.	Critical	Populate with one entry per project (Seva, Bachpanshala, Jeev, Udaan, Prakriti, Vikas), each with a photo, 2–3 sentence description, impact metric, and a direct 'Donate to this cause' button.

3. About Us Page

Image 11: About Us Page

Area	Issue Observed	Severity	Recommendation
Body copy	About page repeats almost the same paragraph already on the homepage, just with more bold/checkmark formatting; heavy use of bold on nearly every phrase reduces the impact of emphasis.	Medium	Differentiate About Us from the homepage summary — use About for founder story, mission/vision, timeline and team; keep the homepage version short. Use bold sparingly, only for genuinely key facts.

Area	Issue Observed	Severity	Recommendation
Missing visuals	No founder photo, team photo, office photo, or timeline/milestones graphic — just certification checkmarks and text.	Medium	Add a founder photo/quote, a short timeline (2020 founding → certifications → today), and 1–2 field photos to build trust and personality.
Certifications	80G, 12A, CSR-1, NITI Aayog and ISO 9001:2015 are named but not shown — no certificate images, registration numbers, or links to verify.	Medium	Add certificate badges/logos with registration numbers (and PDF copies where appropriate) — this is one of the fastest ways to build donor trust for a nonprofit.

4. Volunteers Page

Image 12: Volunteers Page displaying personal Emails

Image 13: Place Holder entries and inaccurate Emails

Lists roughly 30 people with name, role, and contact links (LinkedIn and/or email).

Area	Issue Observed	Severity	Recommendation
Contact details	Personal Gmail addresses (e.g. individually named @gmail.com accounts) are published in plain text/mailto links for most of the 30 listed volunteers, with no organisational email alternative for most.	Critical	Replace personal emails with role-based foundation addresses (e.g. hr@inamigosfoundation.org.in) or a contact form, both to protect volunteers' personal inboxes from spam/scraping and to look more professional.
Duplicate/placeholder entries	Several entries use a name plus a lone period as a placeholder for a missing surname (e.g. "Shiwani .", "Akash .", "Roshi .", "Bhavya ."), and some email addresses are clearly random keyboard strings rather than real addresses.	Medium	Clean up the volunteer database: confirm real surnames or drop the trailing period, and verify each email/social link actually belongs to that person before publishing.
Page structure	All ~30 volunteers are shown in one long undifferentiated list with no grouping by role, region, or seniority, and no photos.	Medium	Group by category (Core Team / HR / Regional Leads / Volunteer Associates) with headshots, and consider showing only leadership publicly with a separate internal directory for the rest.

5. Contact Page

Full Name

Email

Your Message

SUBMIT

Image 14: Contact Us Page

Area	Issue Observed	Severity	Recommendation
Contact form	Form has no visible labels beyond placeholder text (Full Name / Email / Your Message), no field-level validation shown, and no confirmation of what happens after 'Submit'.	Medium	Add persistent labels (not just placeholders, which disappear on typing), inline validation, and a clear success message or redirect after submission.
Map & hours	No embedded map for the Bilaspur/Sipat address and no stated office hours or best-contact-method guidance.	Low	Embed a Google Map and add office hours so visitors and CSR partners know when to expect a response.

6. Blog, Events & Gallery

Area	Issue Observed	Severity	Recommendation
Blog list	Every post is dated Jan–Mar 2025, and several post cards show odd internal view-count numbers (e.g. "0 7674") next to the date with no label explaining what the second number means.	Medium	Publish more recent content on a regular cadence (even monthly) and either label the numbers clearly (e.g. "7,674 views") or remove them if not meaningful to visitors.
Events list	Homepage 'Our Events' also only shows events from Feb–Mar 2025, over a year old at time of review, with no upcoming events visible.	Medium	Keep at least one upcoming/future event live at all times, or replace with a 'Past Impact' framing if no events are currently scheduled.
Gallery	Images are exposed as direct raw file links in a simple grid, with no captions, dates, or alt text indicated.	Low	Add captions/dates per image and alt text for accessibility and SEO; group into albums by project or event.

Cross-Site Recommendations

Design & Layout

- Establish one consistent visual hierarchy (heading sizes, button styles, spacing) — right now buttons, headings and body copy vary in weight between the hero, about section and causes teaser.
- Use real photography of the foundation's work (feeding drives, tree planting, classes) instead of relying mostly on text and icons — this is the single biggest trust lever for a nonprofit site.
- Ensure the site is fully responsive and test the hero carousel and volunteer grid specifically on mobile, since long name/title text can wrap awkwardly in narrow cards.

Content & Trust

- Add an annual report / financial transparency page — donors and CSR partners specifically look for this on 80G/12A nonprofits.
- Add donor and volunteer testimonials with names/photos (with consent) to humanise the stats.
- Add a clear 'Where your money goes' breakdown near the donate flow.

SEO & Technical

- After removing the spam links, submit the site for reconsideration in Google Search Console and re-submit the sitemap — injected gambling links can trigger a manual action/de-indexing.
- Add meta descriptions and alt text sitewide; several pages likely inherited generic titles from the spam injection issue.
- Enable HTTPS security headers and run a malware scan on a recurring schedule with the hosting provider, given the current compromise indicator.

Suggested Prioritization (Next 30 Days)

Area	Issue Observed	Severity	Recommendation
Week 1	Security clean-up: remove spam links, rotate admin credentials, malware scan, CMS/plugin updates.	Critical	Owner: developer (Visio Infotech) / hosting provider.
Week 1–2	Populate the Causes page and fix social icon links.	Critical	Owner: content/marketing volunteer + developer.
Week 2–3	Remove personal emails from Volunteers page; replace with role-based contact.	High	Owner: HR/volunteer coordination team.
Week 3–4	Build on-site /donate page with 80G messaging; add cause cards to homepage.	High	Owner: content team + developer.
Ongoing	Fresh blog/event content, gallery captions, testimonials, annual report page.	Medium	Owner: content/marketing volunteer.
